

Annex A (informative)

Schematic representations of oxygen concentrator supply systems

Key

- A primary source of supply
- B secondary source of supply
- C reserve source of supply
- 1 oxygen concentrator unit(s)
- 2 high-pressure cylinders (containing either oxygen or oxygen-enriched air) or cryogenic liquid vessel(s)
- 3 two banks of high-pressure cylinders
- 4 source-of-supply shut-off valve
- 5 line pressure regulator
- 6 supply system shut-off valve
- 7 optional connection
- 8 to pipeline distribution system

Figure A.1 — Oxygen concentrator supply system with one or more oxygen concentrator unit(s) as the primary source, cylinders or cryogenic liquid vessel(s) as the secondary source and cylinders as the reserve source for a single-stage distribution system
